

CLARUS ITE PTT SYSTEM

INTRODUCING THE CLARUS IN-THE-EAR PUSH-TO-TALK SYSTEM

The Clarus offers premium functionality and capability in the world's smallest and lightest tactical headset system on the market today.

Clarus offers maximum capability and flexibility when two radios or wireless push-to-talk functionality is required. Egressing from SILYNX's highly compact oblique control box, are our proprietary quick disconnect (QDC) in the uplead and download, the operator and connect to SILYNX's range of headsets or others as required on the uplead and to virtually any communications devices on the download.

In addition to accommodating most all headsets and radios in use today, this "smart" system also includes the wireless gateway to connect to our MWPTT or key fob wireless push-to-talk alternatives. CLARUS has been the choice for military and law enforcement officers around the world for nearly a decade.
